

WOMT Summary for March 12, 2010

The WOMT Agencies met and discussed the following:

The DOSS advice to WOMT and NMFS is to implement only the first and third triggers while DOSS evaluates the second trigger. Because neither the first or third triggers have been met, the DOSS advice to WOMT and NMFS is for the CVP and SWP to operate such that OMR is no more negative than -5,000 cfs.

NMFS accepts the advice from DOSS and determines that implementing the first and third triggers of Action IV.2.3 (page 649 of the NMFS Opinion) provides for operations consistent with the intent of this action and is sufficiently protective of older juvenile salmon at this time.
